EXPERIENCE

HCL Technologies Ltd

Sr. Technical Lead

Manchester/UK | Noida, U.P./India

July 2019 – Present

- Analysed and designed business usability studies and initial prototypes, and proposed solutions to increase user engagement.
- Working with the client onsite (Manchester, UK) to understand the requirements and implement them as per the business needs.
- Revamped Manchester United Football Club web application from AngularJS to React using Sitecore JSS, optimizing its performance by 70% and increasing user average time spent or interaction time.
- Implemented Level AA accessibility for people with disabilities to access the MU website with 10 times ease.
- Implemented blend of server-side rendering and client-side rendering for web application to make it SEO friendly and added the feature of tracking of user at every level so that business can focus on revenue generating metrics.

MotherSumi Infotech & Designs Ltd.

Software Engineer

Noida, U.P./India

April 2017 – July 2019

- Consulting for deployment of ALM practices and software, achieved the highest level of customer satisfaction on every deployment.
- Optimized real-time performance of LMS by 50% with a complete UI overhaul and API restructuring.
- Built end-to-end tests and maintained the code coverage of the applications by up to 80%.
- Trained and mentored junior team resources to increase the overall productivity of the team.

GTen Technologies Pvt. Ltd.

Software Engineer

New Delhi/India

June 2015 – March 2017

- Developed and deployed automobile benchmark system based on AngularJS and Laravel.
- Owned, developed, and launched a test automation tool based on POM (Page Object Model) using a selenium web driver to enhance test maintenance.

RELATED PROJECTS

- Complete re-write and Architectural Design setup of web application in ReactJS using Sitecore JSS for Manchester United Football Club, one of the most elite English Premier League football clubs. Implemented SSR in ReactJS with client-side rendering as well to make it SEO-friendly and increase its performance by 70%. Achieved a high level of accessibility for ease of usage for the disabled.
- Led migration of a legacy Money Transfer system to a modern React-based application using Next.js for both Web and Mobile-based customer portals. Built and developed Agent Portal ground up to support agents to perform actions related to transactions and customer profiles.
